Presentation for the Annual CAPAL Conference, Calgary, AB, 2016
“Intellectual freedom is indispensable to librarians, because they are trustees of knowledge with the responsibility of ensuring the availability of information and ideas...[and] so that teachers may freely teach and students may freely learn.’ (Buschman, 2014, p.1)

“An institution cannot foster democracy without practicing it. Broad-based and critical debate over ends, means, choices, exceptions and non-exceptions are again suggestive for specific public educative institutions such as libraries. Can, for instance, a library supports intellectual freedom for its community without practicing it as a workplace?” (Buschman, 2007, p. 1493)

Democratic Theory

• “Simplified, democratic theory seeks to identify the conditions for and obstacles to the exercise of democratic power by informed and engaged citizens in the interest of the commonweal. This focus tapers a rich vein of concepts...the democratic exercise of power and it’s meaning, obstacles to the democratic exercise of power, the mechanics of democracy versus its meaning, the common good, the determination of the common good, citizenship, political deliberation, democratic deliberation, and without stretching the point, forms of power beyond definitions of the public and commonweal and their relationship to the functioning of democracy” (Buschman, 2007, p. 1486).

Conclusion

Academic Librarians **HAVE THE POTENTIAL TO BE** Public Intellectuals

“Knowledge serves society, and it is this particular role of the intellectual as a member of the privileged minority with the luxury of time, facilities, knowledge and training to guide people in making informed decisions...Intellectuals ought to be authoritative, meaning that they possess an abundance of knowledge that can be applied in the service of society...They are important public servants and leaders charged with defending the common and democratic faith.” (Woodford, 2005, p. 22).

*In the neoliberal environment democracy needs public intellectuals to challenge the system and keep inquiry and intrigue alive. This is the outcome of melding theory and practice for Academic Librarians*
